

ABUBUCKER

(Front End Developer)

abubucker705@gmail.com | 63829 17208

SUMMARY

- Experienced Frontend Developer with 5+ years of delivering scalable and **high-performance web applications** using modern JavaScript frameworks and tooling.
- Proficient in **React.js** and **Redux (Toolkit, Thunk, Saga)** with in-depth understanding of component-driven development and **React Hooks**.
- Specialized in creating responsive, accessible, and visually appealing UIs using **Tailwind CSS**, **SASS/SCSS**, **Material UI**, and **Bootstrap**.
- Skilled in front-end performance tuning through **lazy loading**, **code splitting**, **memoization**, and efficient use of the **Virtual DOM**.
- Integrated with **RESTful** and **GraphQL APIs**, managed **WebSocket** connections for real-time data, and implemented secure flows with **JWT** and **OAuth**.
- Well-versed in version control using Git and collaborative workflows on **GitHub**, **GitLab**, and **Bitbucket**, while contributing within Agile/Scrum teams.
- Knowledgeable in CI/CD best practices with deployment pipelines using **Jenkins** and **GitHub Actions**.
- Deployed production-ready apps to platforms such as **AWS S3**, **CloudFront**, **Amplify**, and **Firebase Hosting**, ensuring optimized delivery and compatibility.
- Advocate for secure and inclusive web development, implementing practices for **CORS**, **HTTPS**, **MFA**, **RBAC**, and meeting **WCAG accessibility** standards.

SKILLS

- **Frontend Technologies:** React.js, Redux (Toolkit, Thunk, Saga), JavaScript (ES6+), React Hooks, Context API
- **UI & Styling:** Tailwind CSS, Bootstrap, SASS/SCSS, CSS3, Responsive Web Design, Material UI
- **Performance Optimization:** Lazy Loading, Code Splitting, Memoization, Virtual DOM, Image Optimization
- **API & Data Handling:** RESTful APIs, GraphQL, WebSockets, JWT Authentication, OAuth, Data Fetching & Caching Testing & Debugging: Jest, Cypress, React Testing Library, Postman, Insomnia, Chrome DevTools, Lighthouse
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket, Agile & Scrum Methodologies, CI/CD Pipelines (Jenkins, GitHub Actions)
- **Security & Compliance:** Cross-Browser Compatibility, WCAG Accessibility, CORS, HTTPS, MFA, Role-Based Access Control (RBAC)
- **Deployment & Hosting:** AWS S3, AWS CloudFront, AWS Amplify, Firebase Hosting

PROFESSIONAL EXPERIENCE

DELTA ITECH SOLUTIONS, Bangalore (Software Engineer)

Mar 2020 To till Date

- Developing responsive, user-centric interfaces using React.js, Tailwind CSS..
- Building reusable and modular components to support scalable healthcare applications.
- Integrating RESTful APIs and GraphQL for dynamic data handling and real-time updates.
- Managing application state using Redux Toolkit and Context API to streamline complex logic flows.
- Implementing responsive design and accessibility standards (WCAG) for optimized performance across devices.
- Conducting UI testing using Jest, Cypress, and React Testing Library to ensure high-quality releases.
- Collaborating with backend teams for seamless integration and improved API performance.
- Actively contributing to Agile/Scrum practices, including sprint planning, code reviews, and daily stand-ups.
- Worked with technologies such as [insert key technologies/tools you used, e.g., HTML, CSS, JavaScript, React, Node.js, SQL, etc.].
- Assisted in automating business processes and integrating APIs to streamline operations.
- Adhered to Agile development methodologies and participated in daily stand-ups and sprint planning sessions.

PROJECTS

Project 1: Wayfair

Description

A **Frontend Developer** at **Wayfair** would be responsible for creating and maintaining the user interface (UI) of the company's websites and web applications. This role involves working closely with design teams, backend developers, and product managers to ensure the site is visually appealing, responsive, and user-friendly.

ROLES & RESPONSIBILITIES:-

- **Build modular components** with **React.js** and using **Redux** (Toolkit, Thunk, Saga) for **state management**.
- Implement **responsive design** with **Tailwind CSS**, **Material UI**, **SASS/SCSS**, and **Bootstrap**.
- Optimize **performance** with **lazy loading**, **code splitting**, **memorization**, and **Virtual DOM**.
- Integrate **APIs** (REST, GraphQL, WebSockets), handle **authentication** with **JWT/OAuth**, and apply **data caching**.
- Write **tests** with **Jest**, **Cypress**, and **React Testing Library**; debug with **Chrome DevTools** and **Lighthouse**.

- Work in **Agile**, use **Git** for **version control**, and automate **CI/CD** with **Jenkins** and **GitHub Actions**.
- Ensure **WCAG accessibility**, implement **CORS**, **HTTPS**, **MFA**, and **RBAC** for **security** and **access control**.
- **Deploy** with **AWS S3**, **CloudFront**, **Amplify**, or **Firebase Hosting**; ensure **cross-browser compatibility**.
- **Collaborate** with **backend teams** for smooth **feature integration** and **deployment**.

Project 2: BillingParadise

Description:

A **Frontend Developer** at **BillingParadise** would be responsible for designing, developing, and maintaining the user interface (UI) for the company's applications and platforms.

ROLES & RESPONSIBILITIES:-

- Developed modular and **reusable UI components** using **React.js** and with efficient state handling via **Redux Toolkit**, **Thunk**, **Saga**, and **React Hooks**.
- Crafted responsive and adaptive interfaces leveraging **Tailwind CSS**, **Material UI**, and **SCSS/SASS** for a consistent user experience across devices.
- Enhanced application performance through techniques such as **code splitting**, **lazy loading**, and **component memoization**.
- Integrated **RESTful APIs** and **GraphQL** for data exchange, managed real-time updates via **WebSockets**, and implemented secure auth flows using **JWT** and **OAuth**.
- Actively participated in Agile (Scrum) ceremonies and supported automation in **CI/CD pipelines** with **Jenkins** and **GitHub Actions**.
- Applied best practices for security and accessibility, ensuring compliance with **WCAG**, handling **CORS**, enforcing **HTTPS**, **Multi-Factor Authentication (MFA)**, and **Role-Based Access Control (RBAC)**.
- Deployed front-end applications on **AWS** and **Firebase Hosting**, ensuring smooth cross-browser compatibility and production-readiness.

Project 3: Chewy

Description

Chewy Inc. is a leading online retailer specializing in pet food, supplies, and medications. Founded in 2011 and headquartered in Plantation, Florida, Chewy offers a wide range of products for dogs, cats, birds, fish, and other small animals.

ROLES & RESPONSIBILITIES:-

- Developed reusable UI components using **React.js**, with state handled via **Redux Toolkit**, **Thunk**, and **Saga** for scalable architecture.
- Utilized **React Hooks** and **Context API** to implement efficient and clean component-level state management.
- Built responsive, mobile-first UIs using **Tailwind CSS**, **Material UI**, **Bootstrap**,

SASS/SCSS, and **CSS3**, ensuring seamless user experience across devices.

- Boosted app performance by applying **lazy loading**, **code splitting**, **memoization**, and **leveraging the Virtual DOM** for efficient rendering.
- Connected front-end apps to **RESTful** and **GraphQL APIs**, managed real-time updates via **WebSockets**, and implemented secure authentication using **JWT** and **OAuth**.
- Employed effective data fetching and caching techniques to enhance **load speed** and reduce redundant **API calls**.
- Worked within Agile Scrum teams, maintained code with Git on **GitHub**, **GitLab**, or **Bitbucket**, and automated workflows via **Jenkins** and **GitHub Actions**.
- Adhered to web accessibility standards (WCAG), implemented CORS policies, enforced HTTPS, and integrated Multi-Factor Authentication (MFA) for security.
- Deployed front-end projects using AWS S3, CloudFront, Amplify, and Firebase Hosting, while maintaining cross-browser compatibility for all modern browsers.

EDUCATION

Bachelor of science Physics
The New College 2015-2018
