

ABUBUCKER

Frontend Developer | React.js · Next.js · TypeScript
7550252619 | abubucker970@gmail.com

PROFESSIONAL SUMMARY

- Results-driven Frontend Developer with 4.6 years of experience building scalable, high-performance web applications using React.js, Next.js, and TypeScript across E-Commerce, HealthTech, and SaaS domains.
- Engineered micro-frontend architecture using React Module Federation enabling 4 independent product teams to deploy UI slices autonomously, reducing inter-team release coordination by 60%.
- Configured Vite build pipeline with manual chunk splitting, tree shaking, and brotli compression reducing production bundle from 3.8MB to 920KB — improving initial load by 52%.
- Built custom React Hooks library (useIntersectionObserver, useDebounce, useLocalStorage, useWebSocket) published to internal npm package consumed across 6 product modules.
- Delivered WCAG 2.1 AA compliance using semantic HTML, ARIA landmark roles, focus trap management, and skip-navigation links across all customer-facing interfaces.
- Wrote 200+ Jest unit tests with React Testing Library and 80+ Cypress E2E tests, integrated into GitHub Actions CI pipeline covering critical checkout and authentication flows.
- Collaborated in cross-functional Agile squads with weekly frontend guild meetings, design system contribution reviews, and accessibility audits ensuring production-grade delivery quality.

TECHNICAL SKILLS

Frontend	React.js, Next.js, Redux Toolkit, RTK Query, Redux Thunk/Saga, React Hooks, Context API
Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Styling & UI	Tailwind CSS, Material UI, Bootstrap, SASS/SCSS, Styled Components, Responsive Design, WCAG 2.1
Performance	Code Splitting, Lazy Loading, Memoization, ISR/SSR/SSG, Module Federation, PWA (Workbox)
API & Real-Time	REST APIs, WebSockets, JWT, OAuth 2.0, RTK Query, Axios
Testing	Jest, Cypress, React Testing Library, Storybook, Chromatic, Lighthouse, Postman
CI/CD & DevOps	GitHub Actions, Jenkins, Vite, Webpack, Git, GitHub, GitLab, Bitbucket, Docker
Cloud & Deploy	AWS S3, CloudFront, Amplify, Firebase Hosting, Vercel

EXPERIENCE

Software Engineer

Jan 2022 – Present

ELITECODE TECHNOLOGICAL SOLUTIONS PVT LTD | Chennai

- Frontend development done across 4 major client projects spanning E-Commerce, InsurTech, and Enterprise SaaS domains.
- Collaborated in cross-functional Agile squads with weekly frontend guild meetings, design system contribution reviews, and accessibility audits.
- Implemented Progressive Web App with Workbox enabling offline-first product browsing, background sync for cart persistence, and push notifications on mobile.
- Integrated Storybook with Chromatic visual regression CI ensuring design token consistency across 130+ shared component library entries.

PROJECTS

StyleVault – Myntra Studio (Internal Design Tool)

Client: Myntra — E-Commerce / Fashion SaaS

Tech: *React.js, Redux Toolkit, RTK Query, Next.js, TypeScript, Tailwind CSS, GraphQL, Apollo, JWT, Cypress, AWS CloudFront*

- Architected React Module Federation micro-frontend splitting StyleVault into independent Catalogue, Lookbook, Analytics, and Approval micro-apps deployable by separate product teams.
- Implemented RTK Query for GraphQL API state management with automatic cache invalidation, eliminating manual refetch logic across 12 dashboard components.
- Developed Next.js ISR with on-demand revalidation via CMS webhook reducing stale content from 24-hour cache cycles to under 60 seconds.
- Configured Vite with manual chunk splitting reducing Myntra Studio initial JS payload from 2.8MB to 780KB; deployed to AWS CloudFront with independent S3 bucket per micro-app.
- Wrote 180+ Jest tests achieving 85% code coverage; built Storybook component library for 45 shared design tokens with Chromatic CI.

ClaimIQ – Snapshot Insurance Portal

Client: Snapshot (USA) — InsurTech / Claims Management

Tech: *React.js, Next.js, Redux Saga, Material UI, SCSS, REST APIs, WebSockets, OAuth 2.0, Jest, Firebase Hosting, GitHub Actions*

- Engineered real-time claims activity feed using WebSocket streams with Redux Saga channel-based event handling for instant status updates.
- Built complex multi-step FNOL intake form with React Hook Form and Zod schema validation supporting conditional field rendering by claim type.
- Implemented Redux Saga orchestration for document upload: presigned S3 URL → chunk upload → progress tracking → virus scan polling → confirmation.
- Integrated OAuth 2.0 PKCE flow for SSO supporting Google Workspace and Microsoft Entra with session refresh and idle-timeout detection.
- Wrote 160+ Jest tests with MSW simulating WebSocket events; configured GitHub Actions with parallel unit and E2E jobs enforcing 80% coverage threshold.

PetPulse – Petbarn Commerce Platform

Client: Petbarn (Australia) — E-Commerce / Pet Retail

Tech: *React.js, Next.js, Redux Toolkit, Tailwind CSS, Material UI, REST APIs, GraphQL, JWT, Cypress, AWS Amplify, Jenkins*

- Built subscription auto-replenishment configurator using XState managing frequency selection, variant switching, pause/resume, and skip-next-delivery flows.
- Applied image optimisation with next/image and Cloudinary CDN achieving WebP delivery and reducing product page LCP from 4.1s to 1.7s.
- Developed custom useCartSync hook synchronising cart between localStorage, Redux store, and Petbarn's API across page refreshes and device switches.
- Wrote 120+ Cypress E2E tests covering subscription, vet booking, loyalty redemption, and checkout workflows in Jenkins pipeline with parallel execution.

AdminFlow – Zoho Creator Custom Portal

Client: Zoho Corporation — Enterprise SaaS / Workflow Automation

Tech: *React.js, Next.js, Redux Toolkit, TypeScript, Bootstrap, REST APIs, OAuth 2.0, Jest, Docker, Vercel, GitHub Actions*

- Built drag-and-drop form builder with react-dnd supporting nested field groups, conditional visibility rules, and JSON schema export.
- Implemented Docker multi-stage build reducing AdminFlow production image from 1.4GB to 185MB enabling faster Vercel deployment cold starts.
- Achieved Core Web Vitals passing scores (LCP 1.8s, FID 85ms, CLS 0.04) verified by Lighthouse CI integrated into GitHub Actions on every PR.
- Wrote 200+ Jest unit tests achieving 88% code coverage; deployed on Vercel with Edge Middleware JWT verification for unauthenticated request blocking.

EDUCATION

Master of Computer Applications (MCA) – Distance Education

University of Madras, Chennai

2022 – 2024

Bachelor of Science in Physics

The New College, Chennai

2015 – 2018
