

ABUBUCKER

Software Engineer (Frontend Developer)

☐ 7550252619 | ☐ abubucker970@gmail.com

PROFESSIONAL SUMMARY

- Frontend Developer with 4+ years of experience building scalable, high-performance web applications using React.js, Next.js, and TypeScript across E-Commerce, SaaS, and HealthTech domains.
 - Strong expertise in state management using Redux Toolkit, RTK Query, and building real-time systems with WebSockets.
 - Performed API performance tuning, response optimization, and frontend caching layers.
 - Collaborated with backend, QA, product, and design teams following Agile/Scrum methodologies.
 - Proven track record in performance optimization, reducing bundle size and improving Core Web Vitals (LCP, CLS) using SSR, SSG, and ISR strategies.
 - Experienced in developing reusable component libraries and custom React Hooks to improve development efficiency.
 - Known for improving UI performance, reducing bundle sizes, and eliminating React re-render bottlenecks.
 - Experience with CI/CD pipelines using GitHub Actions and Jenkins, along with testing frameworks like Jest and Cypress.
 - Strong focus on accessibility (WCAG 2.1), responsive design, and secure authentication using JWT and OAuth.
 - Experienced with server-side rendering (SSR), static generation (SSG), ISR, and SEO optimization in Next.js.
 - Hands-on in building high-performance SPAs with lazy loading, code splitting, dynamic imports & caching.
 - Excellent problem-solving, debugging skills (Chrome DevTools), and ability to deliver high-quality, production-ready code.
-

SKILLS

Frontend Development:

React.js, Next.js, JavaScript (ES6+), TypeScript

State Management:

Redux Toolkit, RTK Query, Context API

UI & Styling:

Tailwind CSS, Material UI, Bootstrap, HTML5, CSS3

Performance Optimization:

Lazy Loading, Code Splitting, Memoization, Core Web Vitals (LCP, CLS), Lighthouse

API & Integration:

REST APIs, Axios, Client-side Caching, Error Handling

Authentication & Security:

JWT, OAuth, CORS, Accessibility (WCAG 2.1)

Testing:

Jest, Cypress

Tools & Platforms:

Git, GitHub, Jenkins, GitHub Actions, AWS (S3, Amplify)

Additional:

Responsive Design, Cross-browser Compatibility, Debugging (Chrome DevTools)

Backend Exposure:

Node.js (API integration & collaboration)

PROFESSIONAL EXPERIENCE

Frontend Software Engineer

Delta Itech Solutions, Bangalore

Jan 2022 – Present

- Developed responsive, user-centric UIs using React.js and Tailwind CSS for enterprise applications
 - Built reusable and scalable components following design system principles
 - Implemented Redux Toolkit and Context API for predictable state management
 - Integrated REST and WebSocket APIs with error handling and optimized UI updates
 - Reduced bundle size by 20%, improving overall application performance
-

PROJECT EXPERIENCE

StyleVault – Myntra Studio (Client: Myntra)

Domain: E-Commerce / Fashion SaaS

Tech Stack: React.js, Next.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS, JWT, AWS S3

- Designed scalable frontend architecture enabling independent feature development
 - Implemented RTK Query to streamline API management
 - Reduced bundle size from 2.8MB to 780KB
 - Built reusable component library (45+ components) using Storybook
 - Implemented RBAC with JWT authentication
 - Improved content freshness using ISR (revalidation < 60 sec)
-

ClaimIQ – Screenshot Insurance Portal (Client: Screenshot)

Domain: HealthTech / InsurTech

Tech Stack: React.js, Next.js, Redux Saga, Material UI, SCSS, REST APIs, OAuth, Jest

- Developed real-time claims processing system using WebSockets
 - Built complex multi-step forms with validation (React Hook Form + Zod)
 - Designed document upload workflows using Redux Saga
 - Implemented OAuth SSO with session management
 - Ensured WCAG accessibility compliance
 - Wrote 160+ unit tests and integrated CI/CD pipelines
-

PetPulse – Petbarn Commerce Platform (Client: Petbarn)

Domain: E-Commerce / Retail

Tech Stack: React.js, Next.js, Redux Toolkit, Tailwind CSS, Material UI, REST APIs, JWT, Cypress, AWS Amplify

- Built subscription management system using XState
 - Implemented SSR and SSG for performance optimization
 - Reduced LCP from 4.1s to 1.7s
 - Developed cart synchronization across devices
 - Created loyalty and rewards UI with animations
-

AdminFlow – Zoho Creator Custom Portal (Client: Zoho Corporation)

Domain: Enterprise SaaS / Workflow Automation

Tech Stack: React.js, Next.js, TypeScript, Redux Toolkit, Bootstrap, REST APIs, OAuth,

- Built drag-and-drop form builder using react-dnd
 - Developed workflow visualization using React Flow
 - Implemented OAuth with session synchronization
 - Reduced Docker image size from 1.4GB to 185MB
 - Achieved Core Web Vitals passing scores
 - Maintained 88% unit test coverage
-

EDUCATION

Master of Computer Applications (MCA)

University of Madras, Chennai | 2022 – 2024

Bachelor of Science in Physics

The New College, Chennai | 2015 – 2018
